

Wesley — Pre-closing Brief (DRAFT v2)

*One-page version of the housing park vision. **Updated 2026-06-10 to match the refined direction** (houses-first vacation rentals for European / 1st-world travelers, restaurant later, sourced via San Bernardino + German community). See `docs/EUROPEAN_TOURISM_SPEC.md` for the full version.*

Closing date: 27 June 2026 — 17 days from today (10 June).

What you bought

62 hectares (153 acres) in Escobar, Paraguari, ~78 km / 1.5–2 h from Asunción. Six parcels: 5 in Mbopicua, 1 in Ybyraty. Total price G. 2.503.000.000 (~USD 320k). 10% seña (G. 250.3M) paid to Escribana Peña. Closing on 27 Jun.

The site has: 40–60m sandstone escarpment, year-round spring-fed stream, mature Atlantic Forest, 50–100-year-old colonial stone terraces, existing farm track, ANDE power, two standing structures. Full site analysis: `docs/paraguay_clay_house_research.md` (628 lines).

Refined direction (per your 2026-06-10 note)

Houses first, restaurant later.

Phase	What	When	Revenue
Phase 1	3–6 cob/earthen + timber vacation-rental houses on Airbnb/Booking, target European + 1st-world travelers, style blend = resort + events + eco-natural	Months 1–9 post-closing	starts
Phase 2	Add 3–6 more houses, build event space for weddings / corporate / family reunions	Months 9–18	scaling
Phase 3	European-Dutch restaurant, sourced via San Bernardino + German community, multi-zone (quincho + dining room + bar)	Year 2+	adds F&B

Why this works: - Houses generate revenue fast - Restaurant is a defensible differentiator but only works if there's lodging demand to anchor it - The cob/earthen design is a real competitive advantage — no premium rural vacation-rental brand in PY yet - San Bernardino + German community = concrete supply chain for European ingredients (bread, sausages, cheese, wines, chefs, staff) - Booking.com + Airbnb + direct + PR + German/Dutch

expat networks = distribution that already exists - 62 ha supports 12–16 keys + restaurant + events + eco-trails + preserved forest

What we still need from you to plan well (the 5 most decision-unblocking questions):

1. **Do you already have a personal network** in the San Bernardino German community or the Dutch / European expat community in Paraguay? Names, contacts, frequency of contact. **This is the single biggest predictor of how fast we can move** — Phase 1 in 9 months if the network is warm, 18+ months if cold.
2. **Site visit** — can you (or someone you trust) drive to Escobar this week and photograph what's actually on the 6 fincas? (terraces, stream, existing buildings, road condition, escarpment, pool, waterfall)
3. **Anexo I of the boleto** — the technical descriptions of each finca. Should have been delivered by sellers within 5 business days of 28-Apr. Do you have it? If not, Escribana Peña can chase.
4. **Phase 1 capex range** — rough order of magnitude you're comfortable with for the first 2–3 houses + utilities + reception. USD 200k? 500k? 1M? Determines scope and pace.
5. **Operating entity** — do you want AI Whisperers to draft the structure (S.A. vs S.R.L. vs E.A.S.) and the local-attorney brief, or do you have a local attorney already?

Things AI Whisperers is doing this week

- Building the research tracker ([docs/RESEARCH_GAPS.md](#) , 34 items) so we know exactly what's still open
- Will spin up a subagent on Tier 1 web research: air access from Europe, real Airbnb/Booking data for rural PY, SENATUR statistics, Asunción expat demographics
- Drafting outreach templates (Escribana Peña for Anexo I, AHK Paraguay for German-community supplier introductions, Municipalidad de Escobar for land use)
- The 12 existing renders + 6 pending C-finals stay valid as concept art for the cob house typology within this refined vision

Critical dates

Date	Event
2026-04-28	Boleto privado signed, seña paid
~2026-05-06	Sellers must deliver title docs (5 business days; should already be in hand — verify)
2026-06-27	Escritura pública signing — 17 days away
27-Jun onward	Penalties activate if either side defaults

Closing-day prep checklist (escritura, 27 Jun)

Print-friendly day-by-day version with risk register: [docs/CLOSING_DAY_PREP.md](#) . The checklist below is the executive summary.

Bring or confirm in hand at least 5 days before signing:

- [] **Passports** (Wesley NWF23H565 + Thijs NP19HPFP6) — originals, not copies
- [] **Proof of funds** for the saldo (G. 2.190M to sellers + G. ~313M to Burgos) — bank statement or transfer pre-arranged with Itaú / Ueno / Banco Continental
- [] **Power of attorney** if either buyer cannot attend in person — apostilled from NL embassy if signed abroad, then translated by traductor público matriculado in PY
- [] **Certificados catastrales-registrales** of each finca — confirms libre de gravamen / inhabiciones / embargos at the moment of escritura. Escribana Peña pulls these; verify with her 1 week out
- [] **Comprobantes de pago** — impuesto inmobiliario al día for each padrón (sellers' responsibility per Cl. SÉPTIMA; verify before signing day)

- [] **Anexo I** — technical descriptions (linderos, rumbos, medidas) of all 6 fincas (R02 in the research tracker)
- [] **Comisión a Burgos** — G. ~313M total, partly netted from the seña and partly paid directly at signing. Confirm exact split with Peña 48 h out
- [] **Tax allocation confirmation with Peña** — who pays what (impuesto a la renta is seller; honorarios notariales typically buyer; IVA on commission — verify)
- [] **Designación formal de la escribana** for the escritura (Cl. SEXTA — buyers designate; presumably Peña given she holds the seña)
- [] **Two trusted witnesses** willing to attend if the escribana requests them

Risks to watch on signing day:

- **Seller no-show / refusal** → penalty doubles seña (G. 500.600.000 to buyers per Cl. NOVENA); if sellers signal hesitation in the week before, raise with attorney immediately
- **Buyer no-show / non-payment** → buyers forfeit the seña (G. 250.300.000), less notary costs already incurred
- **Embargo / gravamen surfaces at the last moment** → escribana should detect this; if found, do NOT sign — invoke Cl. NOVENA's automatic prórroga for administrative delays
- **Sellers haven't actually delivered all docs from Cl. OCTAVA (ii)** → this should have happened by ~6 May; if not, chase via Peña now, not 27 Jun

Reference docs (in this repo)

- docs/EUROPEAN_TOURISM_SPEC.md — full refined direction (13 sections, all the Paraguay research)
 - docs/HOUSING_PARK_CONCEPT.md — the menu of possibilities (broader, useful as backup)
 - docs/CLIENT.md — who you are, the contract
 - docs/contract_summary.md — the boleto, parcela by parcela
 - docs/CLOSING_DAY_PREP.md — printable T-7 / T-5 / T-2 / signing-day / T+30 sequence + risk register
 - docs/RESEARCH_GAPS.md — 34 items we still need to find out, with status + owner
 - docs/MASTER_BRIEF.md — design brief + 10 design rules
 - docs/paraguay_clay_house_research.md — 628 lines of site analysis
 - STATUS.md — what's already rendered, what's pending
 - renders/ — 12 verified PNGs of the cob house on the site
-

Drafted by Ivan / AI Whisperers, 2026-06-10. Polish and ship before 27 Jun.
